Checkpoint 15 26-05-2025

**Deckers, Jennifer J.S.J.** 22 days ago

Jennifer: Today I got feedback from Frank en Berry about my portfolio and current progress. Having beginning for every learning outcomes for the third review is something I should not worry about, since I have another review to go one up and get proficient. They are satisfied with my current work and I told them that I'm doing a side project as well to prove all learning outcomes extra. If I continue working like this, add the passion project, ask feedback and incorporate Maikel and Petra's feedback then I shouldn't worry about failing the semester. They also said that I should do what I think is right and not do what teachers say is right.

Checkpoint 14 Stakeholder feedback - Maikel 14-05-2025

Westheim, Danylo D. a month ago

Today we presented our game and got very positive feedback, we got told that we should seriously search for a publisher for the game since there's potential in it.

First we presented our box and board game, We got some feedback on how we can make the box and board better for the presentations. Maikel gave us the idea to cut the sticker in 4 and stick it on 4 cardboards so it's easier to fold. He also suggested that if we have a great working product, he can bring it to a boardgame event to test out. He's even willing to pay us for it.

Then we received feedback on the meeples/men for the game. In summary, they looked good the design was good and fit well with the game.

The feedback for the rulebook saying that the overall design is clear and looks good. However, some parts like the explanation of the shot rule and step 2 could be written more clearly and specifically. A few sentences should also be removed, as they were repeated.

Finally we got some feedback on the app, all in all it was working very well and we got a lot of positive feedback. There could be some more things added like interactivity with moving the phone and maybe emojis so you can distract "spam" other players like for example in mentimeter. We will look at these options and try to implement them.

The progress we have made so far is very good on pace and we are proud of the products we have so far, coming weeks we will work on making everything perfect and implement the feedback.

Checkpoint 13 feedback on prototype and thursday test plan 12-05-2025

Graf, Nisjuheeli N.C.S.E. de a month ago

The feedback for the game suggests several improvements to enhance user experience and clarity. It should clearly indicate which questions were answered correctly. The number of steps a player should move needs to be clearly defined in the app that way it is more connected with the board game and the results would be easier to interpret. The leaderboard should be made more dynamic and engaging. A specific time should be set to announce the final winner, and a punishment, such as a drink, should be added for the person with the lowest score. Additionally, the process to join or start the game should be made clearer, with instructions included for how to rank others and whether players are guessing the person's ranking. Lastly, the size of the questions should be increased for better visibility.

Checkpoint 12 Project progress presentation 08-05-2025**Karabulut, yagmur Y.** a month ago

Today we presented our work for the class and teachers. This week we worked on a product website. Everyone liked our webdesign and the marketing with our mascotte. After testing the figma prototype we are going to start developing. We presented our app and showed how everything works with the lobby, and ranking. We got the question "why would you need the physical cads?" Jan gave us the idea to give each player a deck of 3/5 cards so the cards become more of a need. Also Petra gave us the idea to intergreate something for the 'leader' aswell. Like if eveyone guesses the ranking, the leader gets to move up a tile. Next week we have a showcase, we want to have our high fidelity prototypes done. We are also going to make merchandise like shot glasses, a grinder, etc.

Checkpoint 10 poster presentation 07-04-2025**Karabulut, yagmur Y.** 2 months ago

Today we presented our concept poster. Jan gave us the feedback that we should test and look into the punishments, because the game can be done really quickly so maybe that people have to move back if they have something wrong. He told us that we have to do a lot of play testing with different groups. Penny and Kadian gave us the idea that maybe there should be a function that players can come up with their own questions. Other students seem to really like our game.

Post feedback**Checkpoint 9 Dirk - Poster (WK7) 02-04-2025****Deckers, Jennifer J.S.J.** 2 months ago

Vandaag hebben we de poster laten zien die ik heb gemaakt om te achterhalen of de poster het concept duidelijk laat zien. Dirk vond dat het een hele goede poster is voor het concept, maar er mogen ook wat inzichten inzitten die ons hebben geleid naar het concept. Maikel kwam toen met het idee om een QR-code aan de poster te voegen die naar een landingspagina leidt waar wat inzicht te zien zijn. Verder is de poster sterk, maar wat zinnnetjes mogen groter

**Deckers, Jennifer J.S.J.** 2 months ago

Ook kunnen we het logo van LOOP aan de poster toevoegen

Checkpoint 8 Feedback concept - Maikel 26-03-2025

Deckers, Jennifer J.S.J. 3 months ago

Today we presented our new concept to Maikel. We got positive feedback on our game, but it's important to start paper prototyping as soon as possible and test it out. We now have three levels in our game and every level gets deeper to get to know your friends better, but Maikel advised us that every "level" can be a category or an expansion pack such as friendship, relationship and spicy questions.

Checkpoint 7 Standup Josh & Pennie 24-03-2025

Westheim, Danylo D. 3 months ago

We discussed our poster, what should be the content on it and in what type of format it should be. Josh explained everyone should understand our poster and context behind our project without much explanation, the poster should speak for itself.

Checkpoint 6 Feedback with Medhat & Petra 13-03-2025**Graf, Nisjuheeli N.C.S.E. de** 3 months ago

After sharing our work, plans, and ideas, we received feedback suggesting that we share our concept with the client for confirmation. We were also advised to create multiple ideas/concepts to ensure we have alternatives in case our initial proposal isn't well received or to possibly improve what we currently have. We were also advised to ask our target group if a video is preferred over a rule book. Our coach also advised us not to focus too much on research, as prototyping is also a form of research.

Checkpoint 4 Chris/Petra/Medhat - Project 20-02-2025

Westheim, Danylo D. 4 months ago

We showed our Figma prototype, our brand guide & Website. The brand guide was very positively received. Next to that the Figma design was nicely done but the feedback we received is that we should maybe consider the white theme again by maybe using a dark theme switch or color based on the time of day. Also the borders of the about us stack should be looked at that the borders are consistent.

All in all our progress has been positively received and for next time we are going to focus on implementing the further feedback and we will focus on our video and the poster.

[Post feedback](#)**Checkpoint 1 Feedback branding proces - Maikel & Kadian 12-02-2025** **Ngo, Saomai S.M.** 4 months ago

Today we started with making stylescapes individually, to later on compare with eachother and choose one of the stylescapes/combine multiple elements of our stylescapes together. As feedback from the teacher, he thought it was a good idea to do this, since we all need to show what we have done in our own portfolio as well.
