Checkpoint 7 Feedback op website opzet van Frank Roosen 26-05-2025**Karabulut, yagmur Y.** 20 days ago

We are making a product website for our boardgame. I showed the home page that I made to Frank. As a feedback he gave me that the letters and image in one section looks too big. The rest looked great he said. I asked him if he could help me with gitlab because in the previous semester i worked with github. Frank explained to me how I can clone a repository. It turns out I did do it right but I just looked in the wrong branche and wasn't yet a member of the project. So I fixed all of that and now everything works smoothly.

Checkpoint 6 Feedback portfolio - Maikel 19-05-2025

Karabulut, yagmur Y. a month ago

I asked Maikel for feedback about my portfolio structure and the reading guide. He told me it looked fine. He gave me the tip that for a next portfolio I can skip the extra step of going from the reading guide to the learning outcomes to the project and just make it from the reading guide immediately to the project page. I also asked Pim for feedback about my internship portfolio. He gave me the tip to make an interactive pdf so people can switch easily from one project to the other. Then Maikel also told me to add which tools I used per project.

Checkpoint 5 feedback on Game Design and testing Pennie 19-05-2025

Karabulut, yagmur Y. a month ago

Today Jennifer and I told Pennie that we want to work on the passion project in order to get more proof for our portfolio's. Pennie told us that we already have a lot and that we can work out the game even more rather than doing a separate project. She gave us ideas on how we can work with ethical consideration. We came up with some new ideas for the game to make the board and cards more necessary because that was the feedback we got during the showcase. Pennie told us that we should not stress so much about the assesment because we have done so much.

Checkpoint 4 Chris - Portfolio structure 08-05-2025**Karabulut, yagmur Y.** a month ago

I showed my portfolio structure to Chris. He explained to me that I can better write short summaries in the learning outcomes page because it becomes too hectic in the projects page. I have a little error in the animation of the stars down at the LO section in my home page. When I told him I'm gonna change it, he told me it looked good as it is because there is a beauty in the imperfection. Chris said that he sees a lot of improvement since the last portfolio review.

Post feedback**Checkpoint 3 Feedback with Petra 24-04-2025****Karabulut, yagmur Y.** 2 months ago

I asked feedback to Petra together with Jennifer. We both made two totally different packages for the game which we want to do an A B test. Petra and Medhat looked at my box and told me that the review looks like a corporate sticker, so I want to delete that part. Petra also found a typo on the back of my box.

Last week Petra had given a workshop about Agile working. We could not attend that because we had portfolio reviews. She explained us that we have to work with sprints and connect with the stakeholders more often.

Checkpoint 2 Feedback packaging - Maikel 14-04-2025

**Karabulut, yagmur Y.** 2 months ago

Vandaag heb ik feedback gevraagd aan Maikel over de verpakking en het spelbord van ons spel. Hij gaf aan dat de voorkant van de doos meer informatie moet bevatten om beter de aandacht te trekken. Daarnaast moet ik controleren of het bord toegankelijk is voor mensen met kleurenblindheid.

In onze groep bespreken we momenteel mogelijke wijzigingen aan het spel. Op basis daarvan zal ik het ontwerp van het bord wellicht moeten aanpassen. Verder merkte Maikel op dat de huidige route van start naar finish vrij simpel is, en stelde hij voor om te kijken naar andere grafische modellen, zoals een star plot.

Ook heb ik korte feedback gevraagd over mijn portfolio-website. Hij vond de opmaak er goed uitzien, maar adviseerde me nog te letten op de hoeveelheid tekst. Mijn tekstregels zijn nu te lang, dus die zal ik korter moeten maken.

Checkpoint 1 NodeJS feedback Amer 09-04-2025

Karabulut, yagmur Y. 2 months ago

today we had a workshop about node js. I made the assignment Amer gave us and after that I asked chat GPT to come up with an assignment so I made that one as well. It was an assignment for a weather app. I installed node weather -cli and npm weather -cli. I also made an account in open weather map to get an API. Then I put the code in VS and changed the city and API. Once I typed in node weather.js I got the current weather in Eindhoven.

I think I did well during this assignment. Amer also sent me a different assignment about express and I'm going to look into that now.
